How to use AI

Top Keywords For

ChatGPT

| Write	Explain	Design
Brainstorm	List	Analyze

WRITE

This is the most obvious one, but Chat GPT is very good at writing. The tool can proofread like Grammarly and write creative responses when prompted.

Write a paragraph about the importance of using a design system

The use of a design system is crucial for ensuring the consistency and coherence of a company's digital products. A well- designed design system provides clear guidelines for visual design, user experience, and interaction, which helps to create a cohesive and recognizable brand experience for users.

EXPLAIN

Use this keyword when you want to request and explanation or clarification of a topic or concept.

Explain the term design system

A design system is a collection of design guidelines, components, and tools that work together to create a consistent and cohesive visual style for a brand or product.

LIST

Use this keyword when you want to get a list of items related to a topic.

Explain some common issues when creating a design system

Here are some common issues that can arise when creating a design system:
1. Lack of clarity.
2. Complexity.
3. Resistance to change.
4. Lack of ownership..
5. Unforeseen scalability issues.

ANALYZE

Chat GPT can also look for keywords and do an analysis of a specific topic or data. Tools like Sprig charge for sentiment analysis, but Chat GPT does it for free.

Analyze these survey results: [paste results here]

To analyze UX survey results, you would typically start by collecting and organizing the data. This might involve sorting the results by specific questions or user groups, and calculating summary statistics such as the mean, median, and mode for each question.

DESIGN

Chat GPT is currently limited to text responses but is still very creative. You can ask it to generate wireframes, SVGs, and HTML code.

Design an SVG icon for a doggy day care service.

This icon consists of two rectangles and a triangle, using simple shapes to create a recognizable symbol for a design system.

```php
<svg viewBox="0 0 100 100" xmlns="http://www.w3.org/2000/svg">
  <rect x="10" y="10" width="80" height="80" fill="#1F1F1F"/>
  <rect x="25" y="25" width="50" height="50" fill="#FFFFFF"/>
  <polygon points="40,50 60,50 50,70" fill="#1F1F1F"/>
</svg>
```
Copy code

BRAINSTORM

Use it to request ideas or suggestions on a particular topic or problem. It is important to provide ChatGPT with clear and specific information about what you would like to brainstorm.

Brainstorm ideas for a design system.

Sure, here are some ideas for a design system:
1. Component Library.
2. Design Guidelines.
3. Design Pattern Library.
4. Design Feedback and Collaboration Tools.
5. Accessibility.
